<b>February 13<sup>th</sup></b> <b>Basic School-Age Care (BSAC)</b> <b>Instructor: Desmond Miller, School-Age Specialist with Child Care Resources, Inc.</b> The state of North Carolina mandates BSAC training for all school-age professionals who work in or operate a licensed child care program. The modules in BSAC will cover the elements of quality care, child development, positive guidance, age appropriate activities, environmental design, health/safety, nutrition, and NC Child Care Regulations. The second training session of the day will be SACERS(School Age Care Environment Rating Scale). This training provides a wealth of information through visual presentations, handouts, practice scoring scenarios, helpful hints, and common low scoring items. Designed specifically to stimulate group discussion and participation, workshop attendees at all levels will explore common elements that create high quality learning environments for school age children/youth and be able to use those and apply them in their own programs. ALL afterschool programs can use this information to self-assess their programs and implement strategies to build environments that work for children and staff. Programs working toward increasing quality or higher star licensure should definitely attend. <i>(7 hours) \$10</i>	<b>9:00 am-4:30 pm</b>	<b>SCPC</b>
